VARUN KUMAR GOUD EDIGA

+91 8247868797 — edigavarunkumar66@gmail.com — Portfolio — LinkedIn — GitHub

SUMMARY

AI/ML engineer and full-stack developer with hands-on experience in Python, Java, and JavaScript, focused on building AI-driven applications, REST APIs, and automation workflows. Strong interest in building AI agents and intelligent systems, with practical experience developing scalable real-world projects and optimizing solutions for performance and reliability.

EDUCATION

G. Pullaiah College of Engineering and Technology, Kurnool
B.Tech – Artificial Intelligence 2023 – 2027
CGPA: 7.0

Sri Chaitanya Junior College, Kurnool
Inter – Computer Science 2021 – 2023
CGPA: 7.0

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript
Full-Stack Development: React, TypeScript, REST APIs, Java Backend, FastAPI, Flutter
AI Integration: NLP, AI Agents, Model APIs, Cloud-based AI workflows, Machine Learning, Deep Learning
Databases: MySQL, Database Design, Firebase, MongoDB, Supabase
Tools & Platforms: Git, GitHub, Azure, ServiceNow, SAP ABAP Cloud

EXPERIENCE

AI/ML Engineer Intern — AETHRIZ Oct 2026 – Present

- Developing a personalized health and lifestyle analysis model that generates recommendations from user data, with multilingual support planned for 24+ Indian languages and dialects.
- Developing an AI food and product scanning model that recognizes items from images, analyzes nutritional information, and generates personalized diet plans.

Full Stack Engineer Intern — Masika Care *(Masika Pvt Ltd)* Feb 2026 – Present

- Built and maintain the cross-platform mobile app (Flutter + Supabase) and the public website (masikacare.com) for Masika Care, an AI/ML-driven menstrual health startup recognized under the deep-tech category by Startup India and Startup Odisha.
- Implemented patient and doctor role systems, appointment booking, and real-time in-app chat.
- Led a security and reliability audit across auth flows, database schema, and API key handling, driving fixes ahead of closed beta.

PROJECTS

AI Research Paper Summarizer

- Built a full-stack app (FastAPI, MongoDB Atlas) that extracts summaries, key insights, and citations from research papers using Groq's Llama-3.3-70B model, with semantic search (Sentence Transformers + FAISS) powering a Q&A/chat interface over paper content and added paper-to-paper comparison, JWT-based authentication, and PDF/DOCX upload support, deployed on Vercel.

InterveuX – AI Interview Preparation Platform

- Built an intelligent interview-prep system that analyzes resumes using Azure AI Foundry and predicts suitable job roles using ML-based classification and designed an automated interview flow with personalized mock interviews and a conditional coding round based on detected technical skills.

Optima AI – Dual-LLM Goal-Focused Chatbot System

- Built a dual-LLM chatbot where two AI models generate answers simultaneously and a judge model selects the best response for higher accuracy.
- Designed a goal-driven conversation engine ensuring the chatbot remains task-focused, optimized, and distraction-free for user-defined objectives.

CERTIFICATIONS

- **SAP Certified** – Back-End Developer – ABAP Cloud (September 2026)
- **ServiceNow Certified Application Developer (CAD)** (June 2026)
- **ServiceNow Certified System Administrator (CSA)** (June 2026)
